(15) **Description**

Pressure transmitters CERABAR-S Types PMP71, PMP75 and PMC71 and DELTAPILOT-S Type FMB70 and Differential pressure transmitters DELTABAR-S Types PMD75, FMD77 and FMD78 are used in potentially explosive atmospheres for the measurement of level, flow, differential pressure, over- and under pressure.

Depending on the electronics insert the output of the Pressure or Differential Pressure Transmitter is a 4 – 20 mA current output signal with a superimposed HART digital signal, or the transmitter is connected to a Fieldbus system for the supply and the communication.

The several versions of the Pressure Transmitters differ in type of sensor, type of electronics insert, type of enclosure, process connection etc.

Optionally all versions of the Pressure and Differential Pressure Transmitters may be provided with an indicator and/or overvoltage protection.

A certified intrinsically safe device may be connected to the display interface of all versions for service purposes.

Optionally all intrinsically safe versions of the Pressure and Differential Pressure Transmitters may be provided with an extended sensor cable.

**Thermal data**

For protection level Ga, marking Ex ia IIC T6...T3 Ga

The relation between the temperature class, the ambient temperature and the process temperature is given in the table below.

Temperature class	Process temperature range $T_p$	Ambient temperature range
T6	$-40^{\circ}\text{C} \leq T_p \leq 80^{\circ}\text{C}$	$-40^{\circ}\text{C} \leq T_a \leq +40^{\circ}\text{C}$
T4	$-40^{\circ}\text{C} \leq T_p \leq 120^{\circ}\text{C}$	$-40^{\circ}\text{C} \leq T_a \leq +70^{\circ}\text{C}$
T3	$-40^{\circ}\text{C} \leq T_p \leq 150^{\circ}\text{C}$	$-40^{\circ}\text{C} \leq T_a \leq +70^{\circ}\text{C}$

Remarks:

- T3 only for type PMC71 high
- the lower ambient and process temperature decreases to  $-50^{\circ}\text{C}$  (ordercode option "JN")
