1 Area of applicability

These safety instructions apply to the radar sensor VEGAPULS WL 61 of series VEGAPULS PSWL61.C****H/P/F**** according to EC type approval certificate PTB 10 ATEX 2033 X (certificate number on the type label) and for all instruments with the number of the safety instruction (39361) on the type label.

2 General information

The level measuring instrument VEGAPULS PSWL61.C****H/P/F**** is based on radar technology and is used to detect the distance between product surface and sensor by means of high frequency electromagnetic waves in the GHz range. The electronics uses the running time of the signals reflected by the product surface to calculate the distance to the product surface.

The VEGAPULS PSWL61.C****H/P/F**** consist of an electronics housing, a process connection element and a sensor, an antenna.

The measured products can also be combustible liquids, gases, mist or vapour.

The VEGAPULS PSWL61.C****H/P/F**** are suitable for use in hazardous atmospheres of all combustible materials of explosion group IIA, IIB and IIC for applications requiring instruments of category 1G, category 1/2G or category 2G.

If the VEGAPULS PSWL61.C****H/P/F**** are installed and operated in hazardous areas, the general Ex installation regulations EN 60079-14 as well as these safety instructions must be observed.

The operating instructions as well as the installation regulations or standards that apply for explosion protection of electrical systems must always be observed.

The installation of explosion-endangered systems must always be carried out by qualified personnel.

2.1 Category 1G instruments

The VEGAPULS PSWL61.C****H/P/F**** are installed in hazardous areas requiring an instrument of category 1G.

2.2 Category 1/2G instruments

The electronics housing is installed in hazardous areas requiring instruments of category 2G. The process connection element is installed in the separating wall, which separates areas requiring instruments of category 2G or 1G. The antenna system with the mechanical fixing element is installed in hazardous areas requiring instruments of category 1G.

2.3 Category 2G instruments

The VEGAPULS PSWL61.C****H/P/F**** are installed in hazardous areas requiring an instrument of category 2G.

3 Technical data

3.1 Electrical data

VEGAPULS PSWL61.C****H***

Power supply and signal circuit: (cores brown [+], blue [-])

In ignition protection type intrinsic safety Ex ia IIC
Only for connection to a certified, intrinsically safe circuit.

Maximum values:

$U_i = 30 \text{ V}$

$I_i = 131 \text{ mA}$

$P_i = 983 \text{ mW}$

The effective internal capacitance C_i is negligibly small.

The effective internal inductance is $L_i \leq 5 \mu\text{H}$.

With fix mounted connection cable, $C_{i \text{ wire/wire}} = 125 \text{ pF/m}$, $C_{i \text{ wire/screen}} = 315 \text{ pF/m}$ as well as $L_i = 0.75 \mu\text{H/m}$ have to be taken into account.

VEGAPULS PSWL61.C****P/F***

Power supply and signal circuit: (cores brown [+], blue [-])

In ignition protection type intrinsic safety Ex ia IIC
Only for connection to a certified, intrinsically safe circuit.

Maximum values:

$U_i = 17.5 \text{ V}$

$I_i = 500 \text{ mA}$

$P_i = 5.5 \text{ W}$

The instrument is suitable for connection to a Fieldbus system according to the FISCO model (EN 60079-27), e.g. Profibus PA

or

$U_i = 24 \text{ V}$

$I_i = 250 \text{ mA}$

$P_i = 1.2 \text{ W}$

The effective internal capacitance C_i is negligibly small.

The effective internal inductance is $L_i \leq 5 \mu\text{H}$.

With fix mounted connection cable, $C_{i \text{ wire/wire}} = 125 \text{ pF/m}$, $C_{i \text{ wire/screen}} = 315 \text{ pF/m}$ as well as $L_i = 0.75 \mu\text{H/m}$ have to be taken into account.

The intrinsically safe circuits are electrically separated from parts which can be grounded.

4 Application conditions

The max. permissible ambient temperatures depending on the temperature classes are specified in the following table.

Radar sensor VEGAPULS PSWL61.C*H*******Category 1G instruments**

Temperature class	Temperature on the sensor	Ambient temperature on the electronics
T5	-20 ... +46 °C	-20 ... +46 °C
T4, T3, T2, T1	-20 ... +60 °C	-20 ... +60 °C

For applications requiring instruments of category 1G, the process pressure of the media must be between 0.8 ... 1.1 bar. With the stated permissible ambient temperatures, the 80% consideration of section 6.4.2/EN 1127-1 is taken into account. The application conditions during operation in areas with no explosive mixtures are stated in the manufacturer information.

Category 1/2G instruments

Temperature class	Temperature on the sensor	Ambient temperature on the electronics
T6	-20 ... +60 °C	-40 ... +50 °C
T5	-20 ... +60 °C	-40 ... +65 °C
T4, T3, T2, T1	-20 ... +60 °C	-40 ... +80 °C

For applications requiring instruments of category 1/2G the process pressure of the media must be between 0.8 ... 1.1 bar. If the VEGAPULS PSWL61.C***H*** are operated at temperatures higher than those specified in the above table, please make sure through appropriate measures that there is no danger of ignition from the hot surfaces. The max. permissible temperature on the electronics/housing should not exceed the values specified in the above table. The application conditions during operation without explosive mixtures can be found in the manufacturer information.

Category 2G instruments

Temperature class	Temperature on the sensor	Ambient temperature on the electronics
T6	-40 ... +80 °C	-40 ... +50 °C
T5	-40 ... +80 °C	-40 ... +65 °C
T4, T3, T2, T1	-40 ... +80 °C	-40 ... +80 °C

If the VEGAPULS PSWL61.C***H*** are operated at temperatures higher than those specified in the above table, please make sure through appropriate measures that there is no danger of ignition from the hot surfaces. The maximum temperature on the electronics/housing should not exceed the values specified in the above table. The permissible operating temperatures and pressures are stated in the manufacturer information.

Radar sensor VEGAPULS PSWL61.C*P/F*******Category 1G instruments**

Temperature class	Temperature on the sensor	Ambient temperature on the electronics
T5	-20 ... +42 °C	-20 ... +42 °C
T4, T3, T2, T1	-20 ... +60 °C	-20 ... +60 °C

For applications requiring instruments of category 1G, the process pressure of the media must be between 0.8 ... 1.1 bar. With the stated permissible ambient temperatures, the 80% consideration of section 6.4.2/EN 1127-1 is taken into account. The application conditions during operation in areas with no explosive mixtures are stated in the manufacturer information.

Category 1/2G instruments

Temperature class	Temperature on the sensor	Ambient temperature on the electronics
T6	-20 ... +60 °C	-40 ... +46 °C
T5	-20 ... +60 °C	-40 ... +61 °C
T4, T3, T2, T1	-20 ... +60 °C	-40 ... +80 °C

For applications requiring instruments of category 1/2G the process pressure of the media must be between 0.8 ... 1.1 bar. If the VEGAPULS PSWL61.C****P/F*** are operated at temperatures higher than those specified in the above table, please make sure through appropriate measures that there is no danger of ignition from the hot surfaces. The max. permissible temperature on the electronics/housing should not exceed the values specified in the above table. The application conditions during operation without explosive mixtures can be found in the manufacturer information.

Category 2G instruments

Temperature class	Temperature on the sensor	Ambient temperature on the electronics
T6	-40 ... +80 °C	-40 ... +46 °C
T5	-40 ... +80 °C	-40 ... +61 °C
T4, T3, T2, T1	-40 ... +80 °C	-40 ... +80 °C

If the VEGAPULS PSWL61.C****P/F*** are operated at temperatures higher than those specified in the above table, please make sure through appropriate measures that there is no danger of ignition from the hot surfaces. The max. permissible temperature on the electronics/housing should not exceed the values specified in the above table. The permissible operating temperatures and pressures are stated in the manufacturer information.

5 Protection against static electricity

The VEGAPULS PSWL61.C****H/P/F*** in versions with electrostatically chargeable plastic parts, such as e.g. plastic housing or plastic antenna, have a caution label pointing out the safety measures that must be taken with regard to electrostatic charges during operation.

Caution: Plastic parts! Danger of static charge!

- Avoid friction

- No dry cleaning
- Do not mount in areas with flowing, non-conductive products

6 Use of an overvoltage arrester

If necessary, the VEGAPULS PSWL61.C****H/P/F**** can be connected to an overvoltage arrester, e. g. type B62-36G or B62-30W from VEGA.

If the VEGAPULS PSWL61.C****H/P/F**** are used as category 1/2G instruments, overvoltage protection measures according to EN 60079-14 chapter 12.3 are not required.

When used as category 1G instrument, a suitable overvoltage arrester, e. g. type B62-36G or B62-30W from VEGA (TÜV 07 ATEX 553276), must be connected according to EN 60079-14, Chapter 12.3, for protection against voltage surges.

7 Material resistance

For applications requiring instruments of category 1G or 1/2G the VEGAPULS PSWL61.C****H/P/F**** must only be used in products against which the wetted materials are sufficiently resistant.

8 Grounding

For the VEGAPULS PSWL61.C****H/P/F**** in the version with mounting strap, the strap must be electrostatically (contact resistance $\leq 1 \text{ M}\Omega$) grounded.

9 VEGAPULS PSWL61.C**XG****

VEGAPULS PSWL61.C**XG**** (process fitting "Counter nut") must not be used as category 1/2 G instruments.
