# multimes 4F96 LCD

Housing dimensions (H x W x D in mm)	<b>96 x 96 x 55</b>
Data display	<b>LCD</b>
Serial interface, optional PCB	<b>KBR eBus *</b> <b>Modbus *</b> <b>Profibus *</b> <b>KBR eBus TCP *</b> <b>Modbus TCP *</b>

\* depends on respective device type

## Three-phase energy measuring device

- Highlights**
- Compact design, standard installation size 96 x 96 mm
  - Easily upgradeable interfaces for every application: Modbus, Modbus TCP, Profibus DP, eBus, eBus TCP
  - Convenient LCD display, background illumination e. g. with bar graph for network harmonics
  - Graphical indication of voltage and current levels in accordance to EN 61000

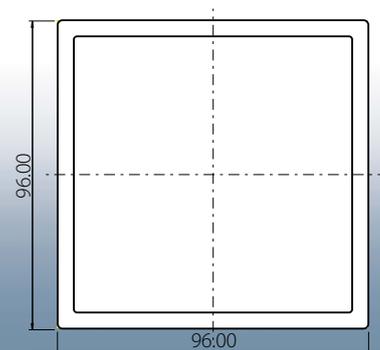

Well-arranged bar graph to display harmonics

Graphical display of I and U in case of a voltage dip

**Convenient LCD display,  
background illumination**

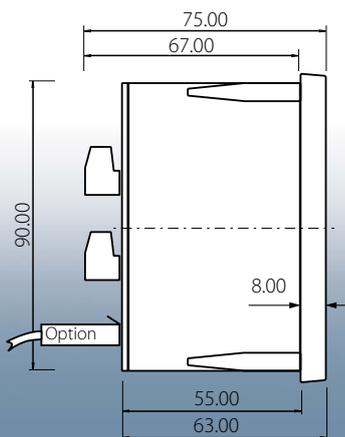

The electronic energy measuring devices of the **multimess 4F96** series measure and monitor all important parameters in a three-phase network and are available in different versions. **All device versions are equipped with a pulse output.** Aside from the 4F96-0... entry level model, the load profile (P+ P- / Q+ Q-) can be saved with all device

versions and later be read out via eBus. Network voltage can be monitored in accordance with EN 61000-T4-30. In case of a violation, the voltage and current history is saved and can be analyzed on the LCD display, for example. Different optional interfaces and protocols allow various applications.
